## Where Do Natural Resources Come From?

Read the list of natural resources in the box below. Think carefully about where each natural resource comes from. Decide whether they come from the earth's surface, the atmosphere, in the ocean or from underground.

Write the name of the natural resource in the correct column of the table. Some of the natural resources will need to be written in more than one column (as they can be found in more than one place).

### Natural Resources

sunlight air plants animals fresh water salt water soil  
minerals oil coal natural gas fibres metals timber

Earth's Surface	Atmosphere	In the Ocean	Underground
